The special combi-boom stand (COR754) can be used either as a standard light stand or with its fold-away arm outstretched to hold either a small lighting head or a collapsible reflector. The boom also has provision to add a weight to counter-balance a head or reflector when the tube is extended.

Item No : COR757

The COR757 2 section boom arm can be fitted to the COR751, 752 & 753 stands. The counter balance weight can be adjusted to accommodate the different weights of the range of Interfit lights. The brass end stud is reversible with both 1/4 and 3/8th threads.
