BEAUTY-SHOT WITH "RING"-REFLECTION IN THE MODELS EYES.

RINGFLASH

THE NEW POWERFUL LIGHT HEAD FOR THE MAGNOLUX STUDIO GENERATOR SERIES.

With its detailed and direct light it is mainly designed for the fashion studio. But it also applies in commercial photography as an ideal lighting tool for shadowless close-up photography of small objects as for instance in medical- and industrial macro photography.

The "basic" ring provides detail rendering bare flash quality, the **large softlight diffusor** provides glossy magazine cover beauty shots.

Due to the outer positioning of the two powerful fans, a maximum cooling effect is achieved. This allows for an almost endless number of flashes.

MARILA-PLUS // Art. Nr 911150
FOR **MAGNOLUX**
